PHOTOGRAPHY STUFF (check all that apply)

360 Virtual Tours Slide Shows Talking Tour CD 360 Tour CD

FOR 360 TOUR ONLY -- CHECK ALL THAT YOU ARE SHOOTING BELOW

Outside Kitchen Master Suite Den/Living

Living 2 Studio Guest 1 Guest 2

Guest House Outside 2 Other

IMPORTANT: Take your GPS device and MEASURE the GPS coordinates in front of the house you are shooting. Put the information above in the LAT & LONG box above.

Enter this data into the Kayyah back office when you process these virtual tours.

SKETCH OUT HOUSE SHOOT BELOW

TURN ON THE LIGHTS BEFORE YOU START SHOOTING...

IMPORTANT TIP

Shoot 360 virtual tours FIRST
Then shoot slide shows.

ANOTHER IMPORTANT TIP

If you shoot a room that is brightly lit, you should mark this on the diagram (left) then come back and shoot the close up of the window a slide show shot later.

Google Earth™

If you have a GPS from Voyager, be sure to measure the GPS from the house you are shooting right now. Put these GPS coordinates into the Voyager (Kayyah) back office and save it. The Voyager push Pin will appear on your satellite maps on Kayyah.com.

If you want to ADD Google Earth Maps to your site, call Barry or Bart (505) 474-3194.

GPS IMPORTANT TIP: If you do not have a hand held GPS, you should ALWAYS get the Zip + Four. This will make for a more accurate GPS coordinate for your Kayyah Satellite Earth Map to appear. If you'd like to add satellite maps to your broker website, call us: 866-902-3600.
